***RADIUS MODELS FIT TIGHTLY INTO THE CORNER ICE DAM AND LIFT OUT SHAVINGS. PREVENTS ICE "RAMPING" AT CORNER GATES: Laser cut to fit National Hockey League (NHL) corner radius of 28 feet (8.5 m)and lift out ice shavings at the step-up between the ice surface and the top of the ice dam (threshold plate). APPLICATION: For Corner Gate ice cleaning, when ice surface is below the top of the ice dam.**
